Kuzub, N. A.
CLEANING OF CALANDRIA FROM INCRUSTATION BY MEANS OF THERMAL TREATMENT. [1963] 6p.
Order from OTS or SLA $1.10 63-14867

Trans. of Sakharnaya Promyshlennost' (USSR) 1949, v. 23, no. 10, p. 8-10.

DESCRIPTORS: Evaporators, Vacuum apparatus, *Scale, *Pipes, Separation, Heat treatment, Refineries.

By the thermal treating of the pipes with scale, the moisture and crystalline water which are connected with the organic and inorganic part of the scale are removed. The colloidal part and the organic compounds (including nitrogen compounds) are destroyed. This causes the physical-chemical properties of the scale to be changed. The diameter of the scale gets smaller which causes its separation from the pipes. Along the pipe-length the scale increases 2 mm. per 200 mm.; the scale falls out easily from the pipe.

Ponomarenko, A. P.
UTILIZATION OF STEAM COMPRESSORS IN THE EVAPORATING SYSTEM. [1963] 8p. (figs. omitted). Order from OTS or SLA $1.10 63-16364

Trans. of Sakharnaya Prom[yshl·nnost'] (USSR) 1954, v. 28, no. 3, p. 11-14.

DESCRIPTORS: *Steam, *Compressors, *Evaporators, Refineries, *Carbohydrates.

Use of steam compressors is effective in all cases, when vapor from last effect goes into the condenser. Due to the work of compressors, the consumption of steam used for the concentration of juice and sirups is saved at the same or increased density. Use of steam compressors increases rate of vapor production which improves performance of the evaporators. Use of compressors in the absence of reserved heat transfer capacity of first evaporator body permits the increase (Food, TT, v. 10, no. 8) (over)
